CAREER OBJECTIVE

I am a full stack web developer with a Web Development certificate from the University of Utah. I have designed responsive web pages and server side applications. I have a background in professional work environments where I learned communication skills, task monitoring and logistics.

WORK EXPERIENCE

Freelance Web Developer	2023 - Present
	<i>Salt Lake City, UT</i>
Eagle Mountain City - Building Dept	2022
	<i>Eagle Mountain, UT</i>
Trajector Disability - Hearing Manager	2017- 2022
	<i>American Fork, UT</i>

PROJECTS

Spellbinder - Worldbuilding and Writing Made Easy.

- Designed a tabletop roleplaying game oriented worldbuilding and writing website.
- Incorporated Leaflet.js for users to upload and customize maps.
- Developed responsive pages so users can easily navigate their works on both desktop and mobile.
- Incorporated a MongoDB backend to store all the users worldbuilding information.

Eventify - Image Share and Scrapbook Creation for Events.

- Developed a user friendly website for image, video and message sharing targeted at large scale events.
- Designed a robust MongoDB backend capable of receiving large amounts of data over the course of the event that categorizes all uploaded data by who submitted it.
- Implemented image editing tools for scrapbook creation. With an intuitive file system users can drag and drop edited photos, videos and messages onto separate pages to be saved and shared.

Co-Calendar - A Calendar Share.

- Incorporated FullCalendarJS to properly show correct calendar information..
- Implemented user authentication, user created calendars with easy calendar share through codes..
- Designed a backend MySQL server to store users, calendars and associated events..
- Built accessible and responsive web pages so users can easily navigate between their personal profile and the calendars they are participating in.
- Displays calendar with several viewing options for optimal accessibility.
